## The Genesis

International Journal of Finance and Policy Analysis (IJFPA) aims to publish high quality papers that are of interest to academicians and practitioners. IJFPA is peer-reviewed and publishes both applied and theoretical papers bi-annually. The journal only considers original manuscripts for publication. IJFPA welcomes contributions in the areas of corporate finance, investments, corporate governance, international finance, financial markets & institutions, credit analysis, financial planning, financial risk management, behavioural finance, financial services management, capital structure, international financial market linkages, portfolio management, financial analysis, financial market regulations, and international banking. Other papers that might be of interest to the readership will be considered for publication. The readership of IJFPA includes academics, professionals, scholars, practitioners, and policy analysts.

## Guidelines to Authors

All articles in IJFPA are published in English biannually in Spring and Autumn. Manuscript must be typed in Microsoft word (Times New Roman with 12 font size, 1.5 line spacing, 1" both sides margin and British spelling throughout). No manuscript should ordinarily exceed twenty typed pages including tables, graphs, figures, notes and references. The title, author(s) including affiliation, correspondence and e-mail address, abstract (not exceeding 250 words), and acknowledgements, if any should be clearly specified in the first page of the manuscript. Notes should be circumvented if possible, but while necessary must be put at the bottom of the text (endnotes) followed by a complete list of references used. The contributors should ensure that they are not infringing copyright. Submission of a manuscript implies that it contains unpublished original work and is not being considered for publication elsewhere.
